

CREAR LA BASE DATOS

*Universidad Tecnológica De Aguascalientes*

*Ingeniería En Desarrollo De Software*

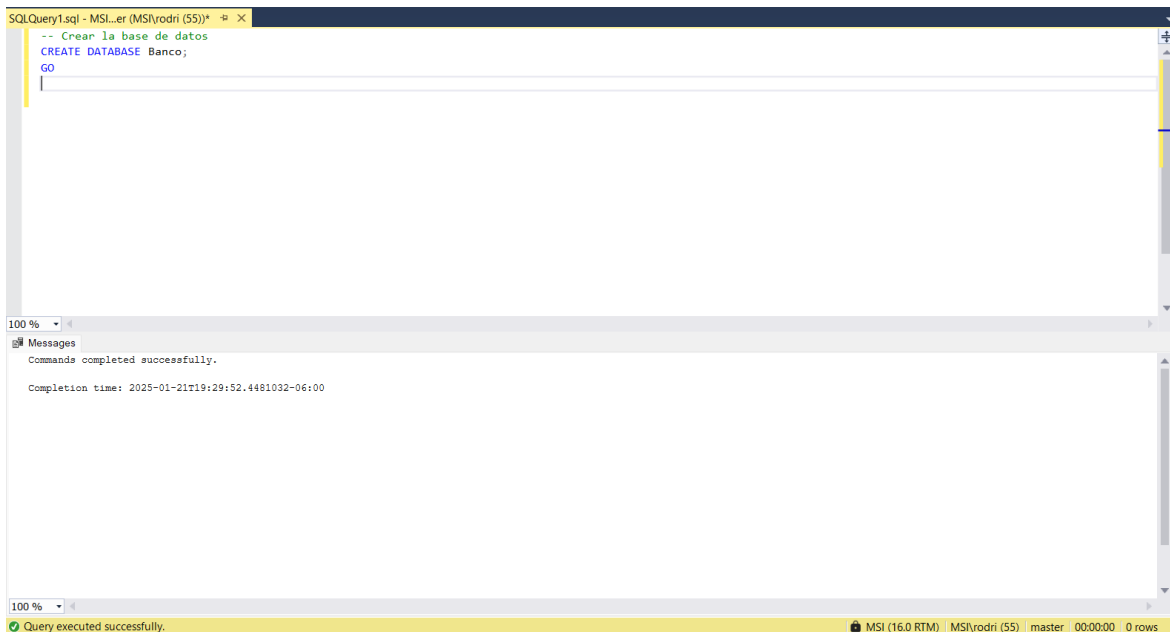

*ADMINISTRACIÓN DE BASE DE DATOS*

***Alumno: Rodrigo Villalpando Jiménez***

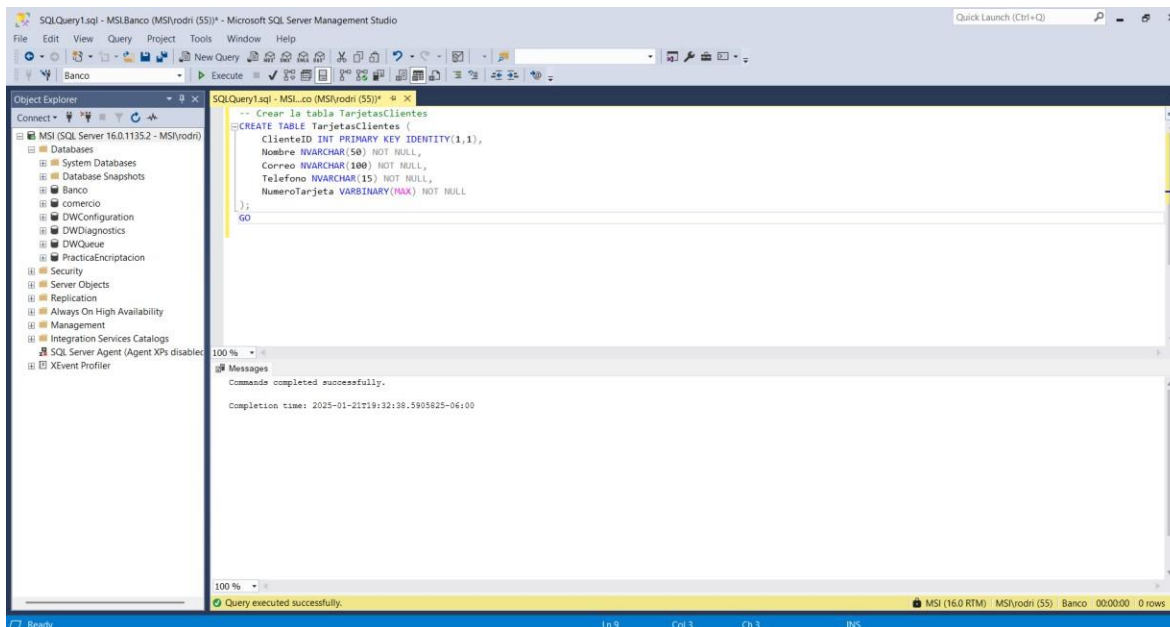

***Docente: Ricardo Israel Roque Covarrubias.***

***Grado y Grupo: 8° A***

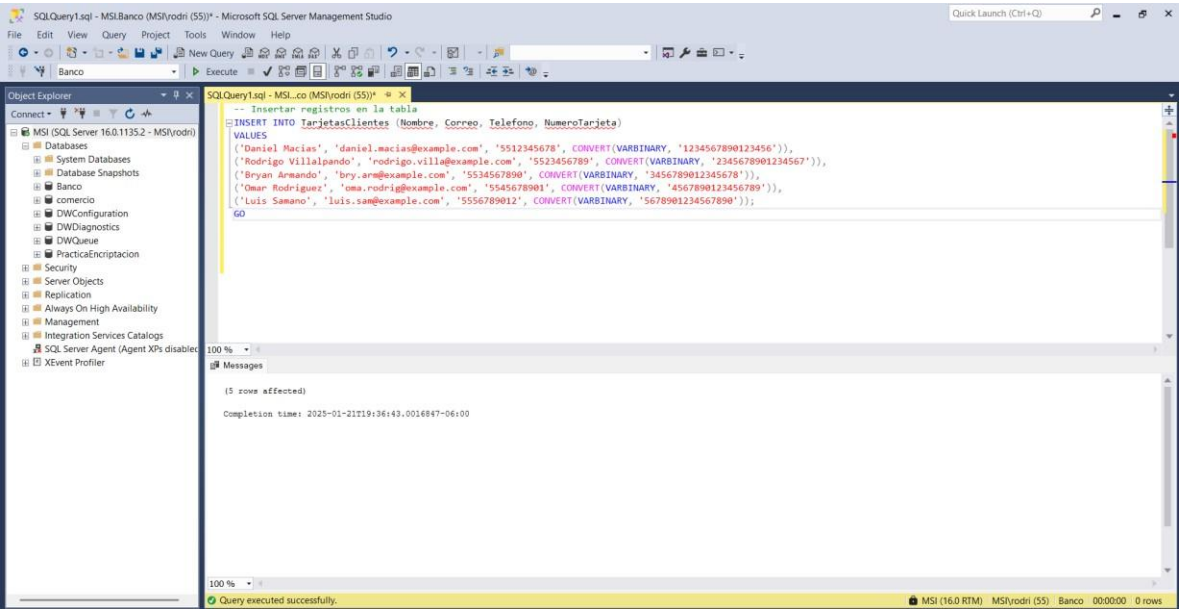

## CREAR LA BASE DATOS

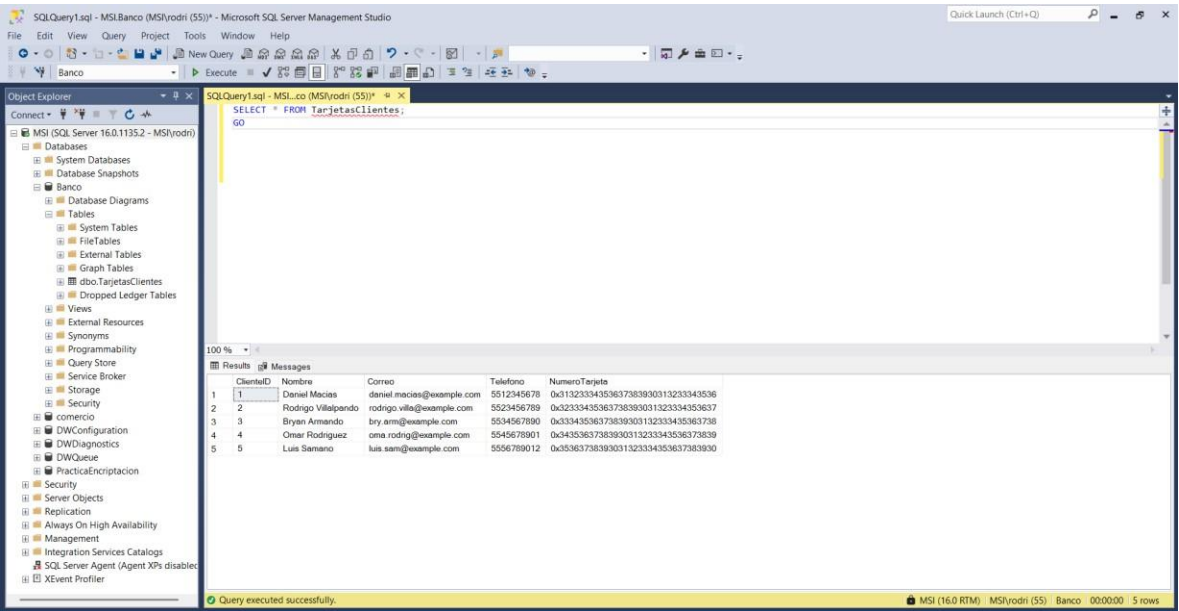

## CREACION DE TABLA TarjetasClientes

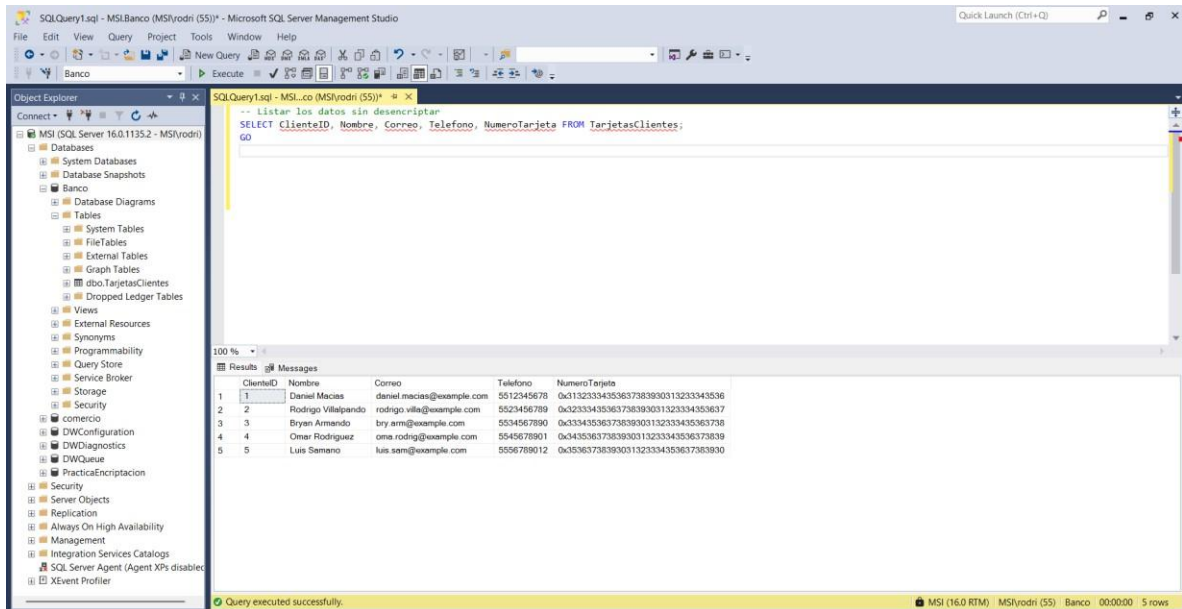

# INSERTAR REGISTROS

# LISTAR LOS DATOS

## LISTADO DE DATOS SIN DESENCRIPTAR

The screenshot shows the Microsoft SQL Server Enterprise Manager interface. The left pane displays the 'Object Explorer' with the 'Banco' database selected. The right pane shows a query window with the following SQL code:

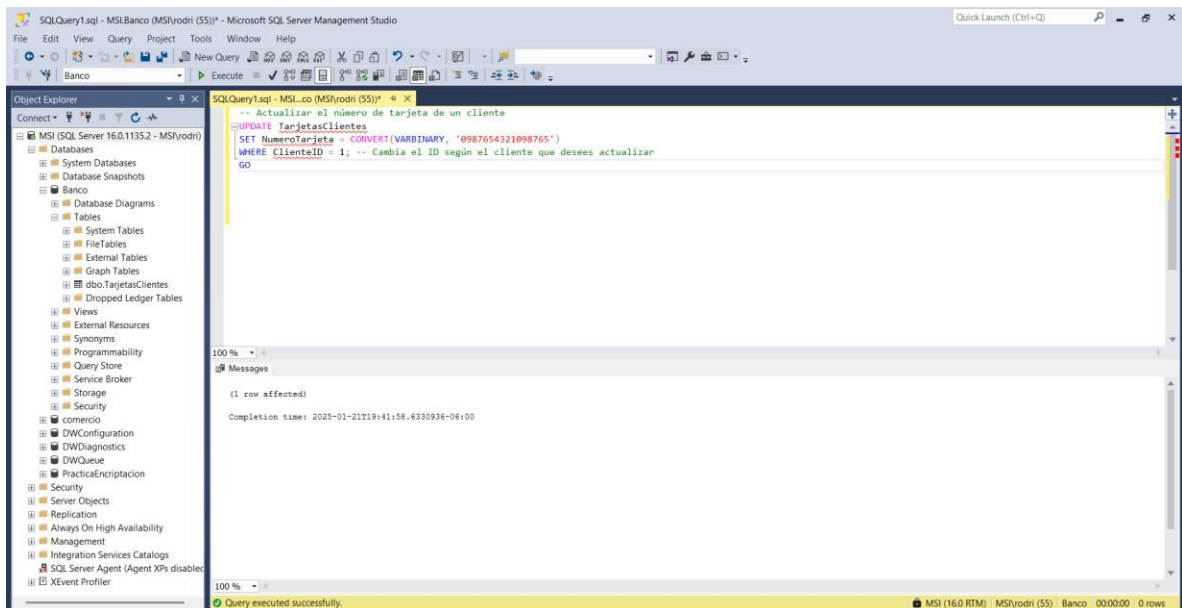

```
-- Listar los datos sin desencriptar
SELECT ClienteID, Nombre, Correo, Telefono, NumeroTarjeta FROM TarjetasClientes;
GO
```

The 'Results' pane displays the following data:

| ClienteID | Nombre              | Correo                    | Telefono   | NumeroTarjeta                      |
|-----------|---------------------|---------------------------|------------|------------------------------------|
| 1         | Daniel Macias       | daniel.macias@example.com | 5512345678 | 0x132334353637383930313233343536   |
| 2         | Rodrigo Villalpando | rodrigo.villa@example.com | 5523456789 | 0x233435363738393031323334353637   |
| 3         | Bryan Armando       | bry.arm@example.com       | 5534567890 | 0x33343536373839303132333435363738 |
| 4         | Omar Rodriguez      | omar.rodri@example.com    | 5545678901 | 0x43353637383930313233343536373839 |
| 5         | Luis Sameno         | luis.sam@example.com      | 5556789012 | 0x5363738393031323334353637383930  |

The status bar at the bottom indicates 'Query executed successfully.' and 'MSI (16.0 RTM) | MSI\rodr (55) | Banco | 00:00:00 | 5 rows'.

## ACTUALIZAR EL NUMERO NUMERO DE UN CLIENTE.

The screenshot shows the Microsoft SQL Server Enterprise Manager interface. The left pane displays the 'Object Explorer' with the 'Banco' database selected. The right pane shows a query window with the following SQL code:

```
-- Actualizar el número de tarjeta de un cliente
UPDATE TarjetasClientes
SET NumeroTarjeta = CONVERT(VARBINARY, '0987654321098765')
WHERE ClienteID = 1; -- Cambia el ID según el cliente que desees actualizar
GO
```

The 'Messages' pane displays the following information:

(1 row affected)

Completion time: 2025-01-21T19:41:56.6330936-06:00

The status bar at the bottom indicates 'Query executed successfully.' and 'MSI (16.0 RTM) | MSI\rodr (55) | Banco | 00:00:00 | 0 rows'.

## LISTADO DE DATOS SIN DESENCRIPTAR
